

education

Northwestern University, 2019

B.S. Human-Centered Product Engineering

experience

Kendo Brands [July 2019 - present]

Packaging Engineer, Associate Manager, KVD Beauty

- Leads development of covetable, sustainable packaging for a full 2-3 year product pipeline with stock or custom tooling
- Reviews and approves technical drawings for accuracy, efficient manufacturing, aesthetic design, and cost feasibility
- Bids out new development projects to global manufacturers and works with them to manage timelines, from brainstorming and conception to T-samples to production
- Establishes quality standards for each product: defect ranges, relevant force measurements (opening, twisting, closing), and acceptable tolerance deviations
- Re-designed over 15 existing KVD products for a disruptive rebrand with new sustainability targets and established the core design direction for all future projects
- Implemented a new specification system to log data on old and new projects such as dimensions, materials, artwork decoration, and manufacturing methods

Product Development Coordinator, Fenty Skin by Rihanna

- Developed the products that launched this innovative, consumer-driven skincare brand in 2020 and worked on future concepts from initial concept through batch production
- Worked on a small team directly guided by Rihanna's feedback and collaborated closely with global vendors and internal cross-functional teams

Glossier [June - Aug 2018] *Product Development Intern*

OXO [Jun - Aug 2017] *Product Development & Engineering Intern*

Tesla Inc. [Jun - Aug 2016] *Product Excellence (Quality) Intern*
